SUMMARY

Aspiring DevOps Engineer with hands-on experience in AWS cloud infrastructure, Linux system administration, and Infrastructure as Code using Terraform. Strong foundation in monitoring, incident management, and cloud operations, with a keen interest in building scalable infrastructure and implementing efficient CI/CD pipelines. Eager to contribute to reliable and automated DevOps environments.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Jawaharlal Nehru Technological University Anantapur

Board of Intermediate Education

Jawahar Navodaya Vidyalaya, Lepakshi

December 2021 – April 2025

Percentage: 79%

June 2019 – May 2021

Percentage: 87%

TECHNICAL SKILLS

- **Cloud Platforms:** AWS – IAM, EC2, S3, VPC, RDS, Route53, CloudWatch, SNS, EKS.
- **Infrastructure as Code & Automation Tools:** Terraform
- **Version Control System:** Git
- **Operating Systems:** Windows, Linux
- **SDLC:** Agile

ROLES & RESPONSIBILITIES

Mavenir Systems Private Limited - Aug 2025 – Present

Graduate Engineer Operations

- Designed, configured, and maintained AWS cloud infrastructure including **EC2, S3, RDS, VPC, Route 53, EFS, ELB, IAM, CloudWatch, and SNS** to ensure high availability and performance.
 - Created and managed complex **IAM policies, roles, and users** to implement secure and delegated access control.
 - Creating S3 buckets and also managing policies for S3 buckets and Utilized S3 bucket backup on AWS
 - Provisioned and replicated infrastructure using **Terraform (Infrastructure as Code)** to enable scalable environments and support disaster recovery strategies.
 - Configured and monitored **CloudWatch dashboards, custom metrics, alarms, and notifications** for proactive monitoring.
 - Performed **Linux system administration** across multiple platforms (Ubuntu, RHEL, UNIX, Windows), including service management, process monitoring, user administration, and log analysis.
 - Assisted in **AWS environment setup**, including configuring Security Groups, NACLs, and network-level access within VPCs.
 - Monitored system performance metrics (CPU, memory, disk, network utilization) and validated application and infrastructure health post-deployment.
 - Conducted **real-time monitoring** of production applications and cloud resources to ensure availability and reliability.
 - Implemented and followed **cloud security best practices**, including IAM role management and controlled access policies.
 - Assisted in automation of routine operational tasks using shell scripting and contributed to optimizing deployment and operational workflows.
 - Having good knowledge on SSH connections and password less authentications between two Servers.
 - Disk Management, partitioning tools like fdisk and Configuring LVM, Volume Group.
-
